Our Thin-Trim capacitors are ideal for applications where size and performance are most critical. These single-turn capacitors exhibit remarkable electrical characteristics for their small size. Useful up to 2 GHz, these trimmers are ...

Trimmer Capacitors - Air Tubular Trimmers - Sapphire Trimmers - Zirconia Trimmers - Air Plate Trimmers - PTFE Trimmers; Film Trim Capacitors; 3mm Capacitors; Thin Film Products. Standard Resistors - Top Side Resistors - Edge Wrapped Resistors; High Frequency Resistors; Microwave ...

Thin-film capacitors were prepared from sputtered tantalum nitride thin films (TaN capacitors). The dielectric was formed by anodic oxidation and the counterelectrode was deposited by evaporation of nichrome-gold. The TaN capacitors excelled the usual TM capacitors in various properties. The temperature coefficient of capacitance was 129 ppm/°C and the dissipation factor was 0.0014 ...

Q: What is thin film circuit technology? A: Thin film circuit technology is used to fabricate electronic components for various applications, including RF devices. Developing thin film involves creating a layer of material with thickness ranging from fractions of a nanometer to several micrometers on a ceramic substrate. This technology offers ...

As the rings mesh the capacitance increases. In a tubular trimmer capacitor, the capacitance can be adjusted with a rotating or non-rotating piston that is permanently attached to an adjusting screw (Figure 1). Figure 1.
