What is a Multicomp pro mclpr capacitor?

The Multicomp Pro MCLPR series capacitors are snap in polarized aluminium electrolytic capacitors. These capacitors are large size capacitors with specially designed self standing terminals and can be directly soldered to printed circuit boards without hol... You previously purchased this product. Polymer capacitors offer a lot of package options between 2.2 to 470 microfarad. Hybrid Capacitors. Hybrid capacitors (polymer hybrid aluminium capacitors) are a mix of wet electrolyte and solid polymer. In this sense, they combine the best of both electrolytes. These capacitors offer high endurance, low ESR, and a high tolerance for ripple ...

Capacitors with this property are marked as X-class (X1, X2 denote different levels of this specification). For capacitors connected between either of the mains wires and earth, so between live (L) and earth (E), or between neutral (N) and earth (E) you are required to use a capacitor that will never fail short, as this can compromise ...

Your capacitor has plastic insulation layer. It has no defined polarity like the electrolytic capacitors have. In this application only an unpolarized and high voltage capacitor is ok because it must stand the mains AC voltage. 400 V is ...
