

Under what circumstances is the warranty for lead-acid batteries

When does a battery warranty start?

For a battery being replaced on Free of Cost basis the warranty commences from the date of sale of the original battery as stated in the original Invoice and not from the date of replacement given. For batteries purchased on pro-rata warranty settlement discount, a fresh warranty is applicable from the date of purchase.

What is the design life of a lead acid battery?

Europe took a different tack. The Eurobat Guide for the Specification of Valve Regulated Lead-Acid Stationary Cells and Batteries defines design life as follows: "The design life is the estimated life determined under laboratory conditions, and is quoted at 20°C using the manufacturer's recommended float voltage conditions." 6

How long does a battery last?

Exceptions on this are: lead-acid batteries; 2 years from date of purchase by the end-user, with a maximum of 30 months from the Victron Energy invoice date, Lithium batteries; 3 years from date of purchase by the end-user. In addition to this, proof of correct battery usage is required when making a battery warranty claim.

Does Battery Group Limited have a warranty?

All products are subject to an obligatory 6 month warranty period whereby it is the responsibility of Battery Group Limited to assess, repair and/or replace the item should there be any manufacturing defects. Some products include further extensions on this 6 month and will be outlined on each product page.

Is a lead-acid battery a good battery?

It is accepted industry practice that a battery is considered "good" or reliable as long as it can deliver $\geq 80\%$ of its rated capacity¹. IEEE 450 and 1188 prescribe best industry practices for maintaining a lead-acid stationary battery to optimize life to 80% of rated capacity.

Can a battery be replaced under warranty?

Check for any physical damage which may have caused an internal break. If, after checking, your battery has more than 80% of its original capacity, it will not be replaced under the warranty because it is considered perfectly functional. Your battery test must show the voltage over 12.2V and below 80% SOH to be accepted.

Overcharge, overdischarge, and reversal: The lead-acid accumulator has a big advantage over other rechargeable battery systems owing to the fact that both polarities consist of lead components (lead, lead dioxide, lead sulfate), which under charge and discharge can be converted into each other. By design and layout lead-acid batteries hence provide a certain ...

Exceptions on this are: lead-acid batteries; 2 years from date of purchase by the end-user, with a maximum of

Under what circumstances is the warranty for lead-acid batteries

30 months from the Victron Energy invoice date, Lithium batteries; 3 years from date of purchase by the end-user. In addition to this, proof of correct battery usage is required when ...

Plus, lithium batteries have a depth of discharge equal to 100% of their battery capacity, meaning you can expect more run time on a lithium battery bank than you would with a comparable lead acid battery bank.

The differences in warranty coverage may arise based on the specific model or type of battery. For instance, motorcycle battery warranties can vary for lead-acid versus lithium-ion batteries. Lead-acid batteries often have a shorter warranty compared to lithium-ion batteries, which could be covered for up to 24 months in some cases.

At 55°C, lithium-ion batteries have a twice higher life cycle, than lead-acid batteries do even at room temperature. The highest working temperature for lithium-ion is 60°C. Lead-acid batteries do not perform well ...

DieHard batteries typically come with a warranty period ranging from 2 to 4 years, depending on the specific model and type of battery. This warranty covers defects in materials and workmanship, providing peace of mind for consumers. Understanding the details of this warranty can help users make informed decisions about their battery purchases. What is the

Exceptions on this are: lead acid batteries; 2 years from date of purchase by the end user, with a maximum of 30 months from the Victron Energy invoice date, Lithium-ion batteries; 3 years ...

Car battery warranties often contain exclusions that limit the circumstances under which a warranty claim can be made. Understanding these exclusions helps consumers make informed decisions. ... Different types of batteries have varying lifespans. Lead-acid batteries, the most common type, typically last between 3 to 5 years. In contrast ...

As for the service life, the recommended replacement cycle for maintenance-free batteries under normal circumstances is about 3 years, which is equivalent to lead-acid batteries. In order to avoid daily maintenance and maintenance, the design of its exhaust system is significantly different from that of lead-acid batteries, so in theory, it is not necessary to add ...

5 Installation, commissioning and operating instructions for vented stationary lead-acid batteries 7140203152 V1.5 (05.2024) Any acid splashes on the skin or in the eyes must be rinsed with plenty of clean water immediately.

All products are subject to an obligatory 6 month warranty period whereby it is the responsibility of Battery Group Limited to assess, repair and/or replace the item should there be any ...
