How do I set up a solar panel?

Note: When setting up your system, the solar panels should be out of the sun or covered for safety reasons. Step 1: Hook up the battery to the charge controller. Connect the battery terminal wires to the charge controller FIRST, then connect the solar panel (s) to the charge controller.

How do you maintain a photovoltaic solar panel?

Panels must be cleaned regularly to maintain their efficiency. Leaves, bird droppings, dirt, and other obstructions should be removed as soon as possible. Periodically check nearby trees' limbs to prevent cracked panels. If you decide to purchase solar cells to make your own photovoltaic solar panel, here is a quick guide.

How do you cover a solar panel?

Cut a piece of plexiglass or other transparent material to the same size. This will be used to cover your panel. After adding spacers to ensure your cover is not sitting directly on the cells, secure it to the backing material with screws. This is where that 5-inch safety margin comes in handy. After this, you should have a bare-bones solar panel!

How do I choose a solar cell?

For both solar cells and solar panels, look into the seller and their product before purchasing. Many panels and cells sport similar appearances, but differ in power output. For a couple of dollars, your solar cells may only be rated for 2.5W instead of 5W.
