

What companies are there in the Buenos Aires battery series

Where will lithium batteries be made in Buenos Aires?

State company Y-TEC, the tech arm of YPF, will open the first lithium battery cell factory in September, in La Plata, the capital of Buenos Aires province. Another plant, five times bigger, will kick off in Santiago del Estero in 2024.

How many people can a lithium battery power Buenos Aires?

The plant will generate 15 megawatts per year, which means it will produce lithium batteries capable of powering 2500 households. The batteries are envisaged for use in rural areas. For example, there is already a Buenos Aires province-backed project to supply the Paulino-Berisso island, home to 70 families who are currently off the power grid.

How many companies are involved in a lithium project in Argentina?

These are some of the findings from a report prepared by the consulting firm Aleph Energy, led by Daniel Dreizzen, which analyzes the global lithium market while delving into Argentina in greater detail. These are the 41 companies of various characteristics that participate in the country's 64 projects.

Does Y-TEC sell lithium in Argentina?

In the case of lithium, Y-TEC signed a contract with American company Livent, which extracts the mineral in Catamarca and, for the first time, sold part of its production in Argentina. According to Salvarezza, for industrialization to grow in scale, part of the production ought to be sold on the local market.

How much lithium will Argentina produce in 2040?

If Argentina manages to bring all of projects to production, the country would produce up to 1.5 million metric tons of lithium carbonate equivalent per year, exporting around US\$30 billion. This scenario could be achieved by 2040, according to Dreizzen's estimates.

Is Arcadium lithium still produced in Argentina?

Arcadium Lithium, the firm that resulted from the merger between Livent and Allkem, two of the three companies that were already producing lithium in Argentina, accounts for 13% of global production. Output has quadrupled in the last ten years, but is still attributable to only a few countries and projects. Another Argentine Unicorn on the Horizon?
