How do solar panels work on a roof?

The solar panels are installed - Once the mounting system is set up, it's time to get the solar panels on the roof. The installer will start by placing the solar panels onto the mounting system, without fully securing them just yet. Once they're happy with the angle of the panels, they will tighten all the nuts and bolts to secure them in place.

Like residents, business owners are highly encouraged to compare installers and prepare their building's rooftops for solar panels. Maintain your solar panel system. If well maintained, solar panels have a life expectancy of over 20 years. To ensure optimal performance and longevity of your solar panel system, regular maintenance is essential.
