

Why did lithium stocks crash?

Lithium Stocks Crashed. Now We Know Why. What It Means for Tesla, EV Battery Stocks. Lithium stocks cratered on Friday. Then, the reason was a mystery. Now, investors know why: The world's largest electric-vehicle battery maker, Contemporary Amperex Technology Co., or CATL, changed its pricing strategy.

Why were lithium stocks badly hit Yesterday?

Lithium stocks were badly hit Yesterday following a couple of bearish analyst notes. Credit Suisse reported rumors of a major cathode producer in China reducing production, threatening to slow down the battery metal's impressive run in 2022, just days after lithium prices reached another all-time high.

Why are Lithium prices falling?

More supply + less demand = falling prices for lithium. As of today, here is the decline in lithium, with this month being either the beginning of the end for lithium or somewhere close to the panic point from which it is more likely to recover: It isn't just lithium prices, though lithium is the poster child for the Battery Revolution.

Why did lithium stocks tumble on Wednesday?

Lithium stocks tumbled on Wednesday as Bank of America cut industry leaders Albemarle (ALB) and SQM (SQM) to underperform from neutral, saying the market for the battery metal will shift from adequately supplied to oversupplied in 2024 and 2025.

Will China's supply shortages hit lithium and rare earth stocks?

With concerning news from China and an electric-vehicle (EV) manufacturer slashing its outlook on supply shortages hitting electric-vehicle stocks hard, lithium and rare earth stocks were bound to feel the heat.

Why did Freyr battery pull back on its expansion plans?

The lithium battery maker had its third-quarter earnings release but pulled back on its expansion plans amid market risk. Shares of FREYR Battery (FREY -27.54%) were plunging today, down over 38.4% in today's trading.

Banking, consumer discretionary and some tech stocks were the star performers, while supermarkets and lithium stocks didn't do as well.

And now, market watchers are taking the view that after raising interest rates by 0.25 percentage points in March, 0.5 in May, and 0.75 in June, the Fed may be preparing to drop a full 1 ...
